

6 Ton Airport Baggage Towing Tractor Three Point And Low Gravity Center Design

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: GOODSENSE
- Minimum Order Quantity: Negotiable
- Price: Negotiable
- Packaging Details: Bare packaging
- Delivery Time: 30-40work days
- Payment Terms: T/T

Product Specification

- Name: Ground Support Equipment
- Options: Fully-enclosed Driver's Cabin
- Place Of Origin: China
- Brand Name: Goodsense
- Condition: New
- Energy Supply: Reference Introduction
- Advantage: Safe And Stable
- Highlight: **Airport electric tow tractor,
Three Point airport baggage towing tractor,
6 Ton electric baggage tractor**

Product Description

SPECIFICATIONS

Brief introduction

Designed by GOODSENSE with reformatory styling and responsible performance, 6 ton Electric Towing Tractor is a new generation of environment friendly vehicle. With ergonomic design principle, driving comforts in sitting, operation space and environmental protection are assured.

6 ton Electric Towing Tractor is three wheels sit-down electric tow tractor, powered by battery. The steering wheel is front wheel and the drive wheel is rear wheel. Imported CURTIS controller with stepless speed regulation is assembled on the tractor. The tractor has low noise, powerful traction power, pleasant operation and elastic steering.

Driving System

Special drive axle for AC type electric tractor is assembled on 6 ton tractor offering low noise, no pollution, stable travelling and good lutation condition. With large ground clearance, good trafficability characteristic is ensured.

Steering System

Compacted structure is applied on the front wheel offering elastic and easy steering operation and high efficiency.

Outstanding intellectualized design

Outstanding intellectualized designs not only assure operator and tractor safety but also improve working efficiency, reduce energy consumption.

Operating System

- 1) Appropriate angle and position of braking pedal and acceleration pedal and slight pedal force fully meet ergonomic demands.
- 2) Adjustable steering wheel is suitable for different operator.
- 3) With good brake effect in cold condition and enough brake force, national compulsive performance standards in service brake and parking brake are satisfied.
- 4) With inching button, safe and accurate connection between tractor and trailer is assured through inching forward/backward.

Easy and reliable side pulling battery changing method

GOODSENSE light model electric tow tractor comes with a towing capacity 6 t. It is ideal for long-travel and multi-shift applications. It adopts many components that also used in forklift truck, such as the power train and heavy-duty brakes. The Curtis or Inmotion programmable AC controller provides regenerative braking, which can reduce brake wear, recharge the battery, and nearly exclude the need for a footbrake.

Our electric tow tractor offers both mental and physical comfort, as well as safety for the driver. The driver's space is capacious for safe access and comfortable driving. What's more, the whole tractor incorporates the simple design and the latest technology, achieving up to 500 hours service intervals and easy maintenance without a laptop.

The AC traction motor features excellent acceleration performance, outstanding climbing ability, low heat emission, and maintenance-free.

Battery side roll out is easy for fast replacement.

The suspension structure is adopted for the front axle and rear axle to greatly boost the operator's comfort during tractor traveling.

The good reliability thank to the three-point and low-gravity-center design.

Options

- Fully-enclosed driver's cabin
- Half cabin
- Suspension seat
- Panoramic view rear mirror
- Warning light
