Product Description

Pick up the Pace

GOODSENSE's double pallet stacker is an ideal forklift for high specific mass, warehouse to warehouse adhibition – combining the capability of a heavy-duty stacker, the flexibility of a pallet truck, and the capability to transport two 1000 kg pallets.

Delivering Results

The pallet stacker is designed to deliver performance so operators can be as productive as possible all shift long.

GOODSENSE is the key. It constantly changes pressure on the drive tyre depending on speed, steering angle, fork height, load distribution, acceleration and braking.

Long-Lasting Value

GOODSENSE forklifts are built to bear the constant challenges of warehouse environments – so they can deliver the reliability and uptime you depend on.

Robust mast, an enhanced chassis and the toughest side handle available.

Spring-loaded drive unit with heavy-duty castors makes a decisive difference in durability and drawing control.

Accomplish More

It's a fact: operators who are comfortable and confident are more productive than those who are not. That's the incentive behind GOODSENSE's commitment to forklift design and ergonomics.

Flexibility Pays

GOODSENSE ride on pallet stacker far exceeds typical expectations for double stacker pallet trucks in terms of productivity control, durability and versatility.

The double stacker series is available in offering travel speeds of up to 6/5.5 km/h.

The folding platform with Quick-Exit side restraints offers the flexibility to switch between rider and pedestrian mode.

The fixed platform with side entry and backrest is especially useful for transport picking.

The fixed platform with rear entry features a secure, comfortable operator compartment for high traffic areas.

For dedicated pedestrian use, the double stacker can be configured without the platform.

Count on Uptime

GOODSENSE builds long-term value into all of its lift trucks and the ride on pallet stacker is no demurral.

With GOODSENSE's unique vertically integrated manufacturing and aftermarket services, total cost of ownership can be substantially lower over time.

Work Assist accessories support operator comfort and productivity.

Options and Accessories

Heavy-Duty Dual Castor Wheels

Heavy-duty dual castor wheels perform in even the severest applications, including rough floors, long runs and extreme heat.

Freezer Conditioning

Freezer conditioning allows the lift truck to maintain performance in cold storage facilities.

Load Backrest

The steel-constructed load backrest stabilises loads and prevents pallet movement.

Dual Initial Lift Controls

The dual initial lift controls allow operators to control the position of the load arms with either hand.
